-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
2. The submitted IDS has been considered. A copy of applicant-submitted Form PTO1449 is enclosed.
3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
4. Re submitted JP 7-332422, the examiner has requested a translation from STIC to determine its teachings and will forward a copy to applicants when obtained.
5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3683

6. Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Asa et al(US006158559) in view of Yasuda(US6659243) or, in the alternative, Yasuda(US6659243) in view of Asa et al(US006158559).

The reference to Asa et al discloses the invention substantially as claimed except for the feature that the press molded synthetic layer is made from sheet material which feature is taught by Yasuda. It would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify the reference to Asa et al to make the pressed molded product of the rod guide of sheet material as taught by Yasuda since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious design choice. *In re Leshin*, 125 USPQ 416.

In the alternative, it would have been obvious at the time the invention was made to one having ordinary skill in the art to which the invention pertains to modify the sheet material formed rod guide of the reference to Yasuda(US6659243) to make the guide of synthetic resin material as taught by reference et Asa et al the pressed molded product of the rod guide of sheet material as taught by Yasuda since it has been held to be within the general skill of a worker in the art to select a known material on the basis of its suitability for the intended use as a matter of obvious choice. *In re Leshin*, 125 USPQ 416.

Re the method of applying the synthetic layer or coating, the method would have been a common manner of applying the coating or layer.
